

Company LM.NT was founded in 1999 and his activity is the manufacturing of blending gaz systems for divers and diving centers. Its products, recognized worldwide for their advanced technology, often copied, but never equaled, are extremely reliable, efficient and safe. Whether making Nitrox, Trimix or Heliar for technical diving, LM.NT blenders provide their users with increased safety, ease, economy and profitability for their diving center.

The LM.NT range consists of four mixers, all of which benefit from the CE certification. From the « base » blender, the first step in the production of Nitrox to the « King » blender, with its proprietary software, either fixed or for expedition, each LM.NT product will provide you a solution to meet your objectives.

Whether for personal or professional solution, make the choice of safety and technology with LM.NT blenders.

Nitrox Trimix gaz blenders

SAFETY * RELIABILITY * PERFORMANCE * ECONOMY

LM.NT BLENDERS ARE CERTIFIED

With the development of technical diving with Nitrox and Trimix, the need for a system to provide gas mixture in a safe and economical way is obvious to diving centers who want to grow their business and provide service quality to their customers.

By using LM.NT blenders you make sure you are equipped with a high-tech system, with proprietary software, safe, and already installed in more than 30 countries worldwide. LM.NT blenders are CE certified and have a fast and efficient

With many years of R & D behind them, LM.NT blenders ensure a perfect safety. They mix and control the gas flow, before it is sucked by the compressor and compressed in cylinders. Thus, the oxygen and helium bottles are completely emptied. No loss, a lot of savings.

The system is completely transparent to air inflation. It requires very little maintenance and is suitable for all compressors from 100 to 850 liters / minute. It is also customizable to fit your exact needs, and it is also scalable : LM.NT allows you to upgrade your installation from the base to the Genius and King.

Base blender

Direct Nitrox production up to 40%, with your compressor.
 Easy to install and use.
 Continuous filling
 Works with all compressors from 100 to 600L/min.

CE certification

King blender

Easy to install and use for Nitrox and Trimix blending, with electronic control and proprietary software management..
 24v Power supply by the compressor or separated.
 Diving simulation with the integrated software to find the best mix.
 Visual and sound alarms. (Hypoxia et hyperoxia)
 Software sensor management.
 Automatic disconnection in case of anomaly

CE certification

Genius blender

Easy to install and use for Nitrox blending, with electronic control and proprietary software management..
 24v Power supply by the compressor or separated.
 Diving simulation with the integrated software to find the best mix.
 Visual and sound alarms.
 Software sensor management.
 Automatic disconnection in case of anomaly

CE certification

Expedition/Boat blender

Nitrox and Trimix blending, same as the King, but portable version, or suitable for boat installation.
 Automatic shut-off in option

CE certification
